

Teaching Social Skills

The following guiding questions go with the Teaching Social Skills video that is a part of the follow up to the Behavior Interventions in the Classroom professional learning. The guiding question can be used for individual reflection or facilitating small or whole group discussion after viewing the video.

Guiding Question

1. If your school is already implementing School-wide PBIS, how might you begin to incorporate social skills into your behavior matrix and behavior lesson plans?
2. Based on your classroom (or school) observations, which social skills would be beneficial for students in your classroom, grade level, and/or school to receive explicit instruction in?
3. Identify at least one benefit to teaching social skills class-wide rather than just in small group or to an individual student?

Michigan's MTSS Technical Assistance Center is funded by the Michigan Department of Education and the U.S. Department of Education, Office of Special Education Programs.
